

Your Payback Guarantee

Start Saving From Day One

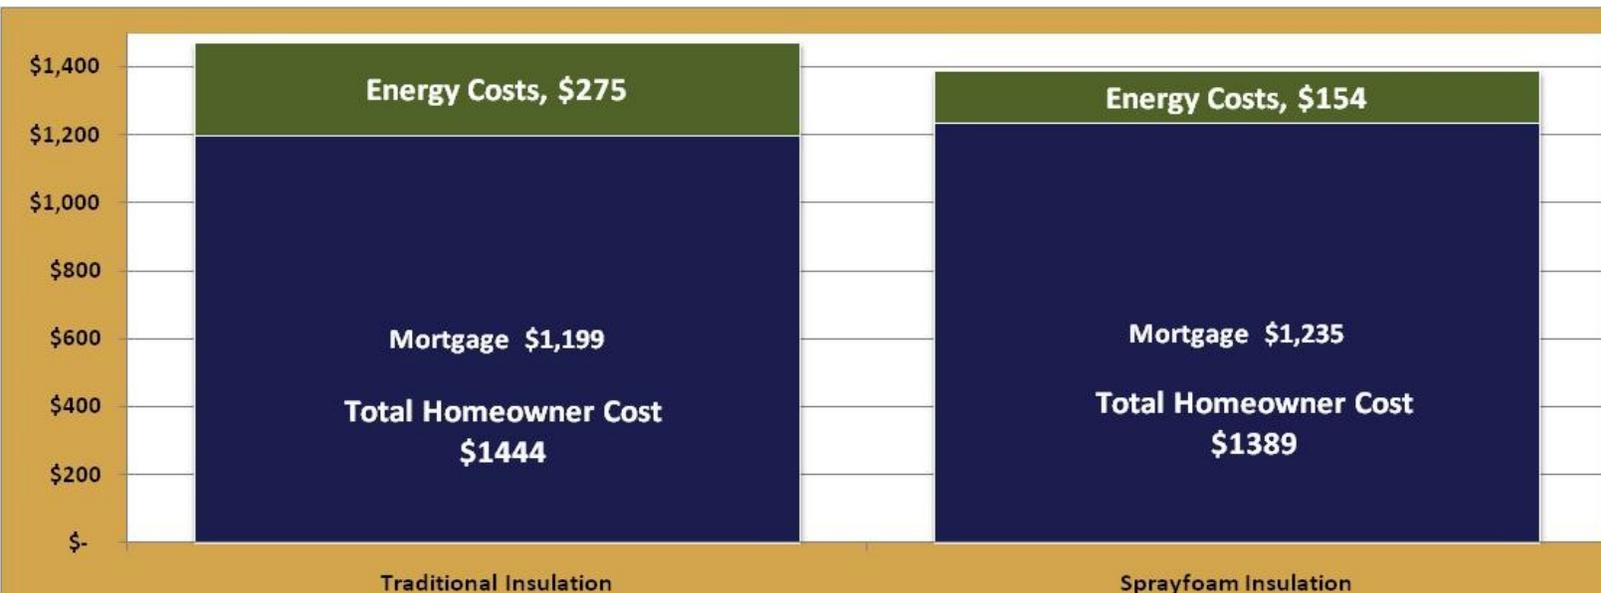

Why wait for savings?

Assured Energy doesn't just save you money on your energy bill. It pays for itself ON DAY ONE, and begins to put money back in your pocket immediately. We're so sure of this, we provide a written 3 year energy guarantee.

Case in Point:

A homeowner buys a \$200,000 home with traditional insulation. Their mortgage at 6%/30 yr would be \$1199 and their monthly energy costs would be estimated at \$275. If the homeowner chose Assured Energy featuring SWD foam insulation their mortgage would have increased to \$206,000. At the same 6%/30 yr would be \$1235 but energy costs would have dropped to \$154. As shown in the chart below, this means that choosing the Assured Energy feature reduces your total home cost by \$85 a month or \$30,610 over the life of a 30 year loan.

What could you do with that money?

How Much Will You Save?

One of the great things about Assured Energy is that you can predict your energy costs even before you move in. This allows you to better understand your total house cost savings that result from your choice to use Assured Energy.

Your exact savings will depend upon installation costs, your local utility rates, and the interest rate of your mortgage. However the chart below can help you calculate what your savings will be.

The example below shows that the incremental costs of \$4,000 is completely paid for with energy savings of less than \$30 per month. The chart also shows that a \$10,000 insulation system can pay for itself with energy savings between \$50-\$75. (depending upon interest rate)

What other home option more than pays for itself on day one?

Incremental Monthly Payments on a 30 Year Fixed Rate Mortgage

	5%	5.25%	5.5%	5.75%	6%	6.25%	6.5%	6.75%	7%
