

# SWD Urethane Environmental Commitment

What does it mean to be green? With so many definitions out there it is difficult sometimes to understand whether or not a product is "green".

At SWD we try to keep our definition of green simple. We are committed to promoting environmentally safe products that reduce energy consumption, create healthier living conditions, and promote sustainable design.

Because our roofing and insulation products create a seamless air-barrier and the most effective building envelope, they have been proven to reduce energy consumption and carbon footprint size. Our QUIK-SHIELD insulation and roofing products have been proven to reduce energy use by over 40%.

All SWD Quik-Shield insulation and roofing products create healthier living conditions.

- Non-ozone depleting
- Formaldehyde Free
- Low VOC
- Reduce dust, pest traffic and noise

Quik-Shield products also promote sustainable design.

- SWD Quik-Shield® | 106 has more than 13% pre-consumer recyclable/rapidly renewable content based on weight.
- SWD Quik-Shield® | 111, 112, 125 & 450 all have more than 8% pre-consumer recyclable/rapidly renewable content based on weight.

## Environmental Partners

SWD is pleased to partner with the following organizations to promote energy efficiency and environmental responsibility:

- U.S. Green Building Council (LEED)
- Energy Star
- Cool Roof Rating Council
- GREENGUARD®

SWD has received listing approval from the GREENGUARD Environmental Institute for Quik-Shield 112 closed-cell spray foam insulation.

This product has been tested to and met the GREENGUARD standard for Children and Schools. This standard is for products intended for use in schools, daycares or other environments where children spend significant periods of time. The GREENGUARD Children & Schools™ Certification Program represents the most strict certification criteria for indoor air quality.

SWD is proud to partner with the GREENGUARD Environmental Institute to promote the improved indoor air quality that spray foam insulation provides.

Additionally, Quik-Shield 106 open-cell and 112 closed-cell foams have both passed stringent Canadian government requirements for VOC levels.
